(54) Title: **TELETEXT RECEIVER ARRANGEMENT**

(57) Abstract: A teletext receiver arrangement comprises a receiver for receiving broadcast data including teletext data elements through a broadcast channel (8,9); a teletext processor (12,13) for extracting the teletext data elements from the broadcast data; and processor (13) for generating a video signal encoding a customized teletext page from the teletext data elements according to a set of instructions. The teletext receiver arrangement comprises an interface (20) for establishing a connection to a server (7) through an interaction channel (21), and is programmed to download a piece of computer code implementing the set of instructions from the server (7) through the interaction channel (21).

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 H04N7/088

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 H04N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, PAJ, WPI Data

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
